

AARTHI S

Data Analyst | AI/ML Engineer | Data Science

+91-63854-81983 aarthia776@gmail.com github.com/AarthiS Rajapalayam, India

SUMMARY

I am a motivated and detail-oriented aspiring Data Analyst and AI/ML enthusiast with a strong foundation in Python, SQL, Data Visualization, Machine Learning, and Data Science. I am passionate about transforming raw data into meaningful insights using analytical and visualization tools. I possess skills in problem-solving, dashboard development, and building data-driven solutions with a mindset geared towards continuous learning.

EXPERIENCE

Full Stack Development Intern

Astro Web Solution

10/2025 – 11/2025 Madurai, Tamil Nadu

A web development company focused on creating innovative web applications

- Developed and maintained web applications using HTML, CSS, JavaScript (frontend) and Node.js, Express.js (backend), implementing end-to-end feature workflows.
- Built responsive UI components and integrated RESTful APIs, reducing frontend-backend integration issues during sprint delivery.
- Managed MySQL databases for application data storage, including schema design and query optimization for key features.
- Collaborated in an agile team environment, participating in daily stand-ups and delivering assigned features on schedule.

AI/ML Intern

InternPe

04/2025 – 06/2025 Remote

A remote internship program focused on integrating intern experiences across various domains

- Built and evaluated machine learning models using Python, NumPy, Pandas, and Scikit-learn across supervised learning tasks.
- Performed data preprocessing and feature engineering pipelines to improve model accuracy and generalization.
- Integrated trained ML models into web interfaces via Flask REST APIs, bridging the gap between AI research and full-stack delivery.

EDUCATION

B.Tech in Information Technology (Hons)

Ramco Institute of Technology

08/2022 – 06/2026 Rajapalayam

Higher Secondary (HSC)

C.A.R.M Higher Secondary School

04/2021 – 03/2022 Vilathukulam

Secondary Education (SSLC)

M.S.M School

04/2019 – 03/2020 Nagalapuram

CERTIFICATIONS

Python Basics
Programming in Java (Elite)
Database Management Systems (Elite)
Data Science Using Python (Elite)
Artificial Intelligence Tutorial
Java Full Stack – TalentNext Wipro Course

SKILLS

Languages: Python, Java, SQL, JavaScript
Backend: Python, Flask, FastAPI, RESTful API, Node.js
Frontend: HTML5, CSS3, React, Responsive UI
Databases: MySQL, PostgreSQL, SQLite
Data Analytics: Power BI, Excel, Data Visualization, Statistics
ML / AI: Scikit-learn, NumPy, Pandas, Random Forest, Data Preprocessing
Tools: GitHub, VS Code, Jupyter Notebook, Google Colab, Postman

PROJECTS

Zomato Restaurant Analytics & Customer Insights Dashboard

A project focusing on analyzing restaurant data for insights

- Analyzed restaurant datasets to identify customer preferences, restaurant performance, and rating trends.
- Performed data cleaning and preprocessing using Python and Pandas.
- Built interactive dashboards using Power BI for visual analytics.
- Identified insights related to pricing, cuisines, customer ratings, and online delivery trends.
- Used charts, KPIs, and filters to improve business decision-making and customer understanding.

Employee Performance Prediction System

A project for predicting employee performance using machine learning techniques

- Built a full-stack application with a React.js frontend and Flask backend to predict employee performance levels (Low / Medium / High) in real time.
- Designed RESTful API endpoints to serve Random Forest classifier predictions, achieving reliable multi-class classification performance.
- Integrated MySQL for structured employee data storage and exposed model results through an interactive dashboard.
